

How Does ProTecht *Shield* Work?

Our proprietary technology protects against a wide range of microorganisms. **ProTecht *Shield*** bonds to the surface of your garments and home textiles creating a layer of protection. At the molecular level, **ProTecht *Shield*** actually acts like a layer of piercing swords when it comes in contact with bacteria, disrupting its ability to function or create smelly odors.

Who is involved with the technology brand?

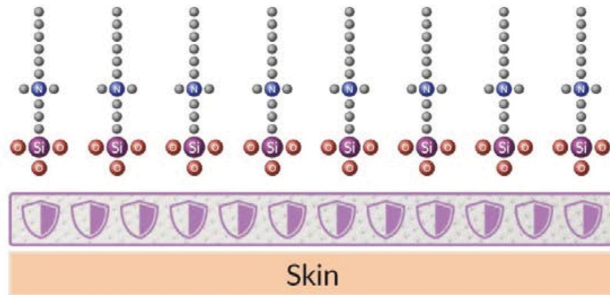

The ProTecht, For A More Sustainable You brand is owned and managed by SANITIZED (USA), Inc. and ProTecht MFA, the textile finish that provides the ProTecht Shield benefit, is globally available through our Co-Producer Network. Each Co-Producer is strategically located around the world to provide technical and marketing support. Services provided by our Co-Producers are in English and in the local language.

Protech *Shield* Consumer Benefits

- Antimicrobial
- Skin Friendly
- Eco Friendly
- Durable for 60+ Home Launderings
- Metal Free
- Particle Free
- Non-Leaching

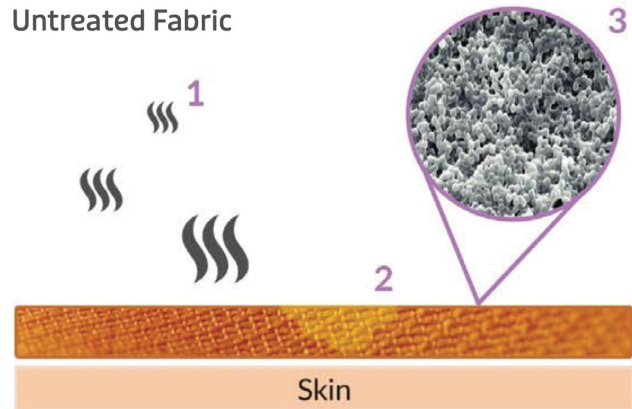

How Does ProTecht Shield Work?

Fabric Treated with ProTecht Shield

1. Invisible protective layer
2. Attracts and disrupts bacteria
3. Extends the products usability

Untreated Fabric

1. Unwanted odors caused by bacteria
2. Discoloration caused by bacteria
3. Biofilm formation in the fabric

Marketing and Hang Tags

Products utilizing our technologies are eligible to use our ProTecht For A More Sustainable You branding material.

Additionally, our in-house marketing team provides assistance with brand positioning, claim language, and POS materials such as custom hang tags.

Testing Method

ProTecht MFA is tested according to ASTM E2149-20, and verified by the International Antimicrobial Council, as the optimal testing method to validate the real world performance of the ProTecht *Shield* feature.

Global Compliance

- EPA Registered
- EU BPR Registered
- Bluesign Approved
- Oeko-Tex Standard 100
- ZDHC Level 3
